Logo Design-
Due : May 15.

Social Media Ads-
Due : May 20.

Design Rationale

Overview: This design focuses on a "Mobile-First" approach for Meera, a busy freelancer. The goal is to reduce cognitive load by highlighting only the most essential data.

Key Design Decisions:

- Visual Hierarchy:** The "Total Earnings" is the largest element because financial tracking is Meera’s primary motivator and a major pain point.
- Accessibility:** Buttons and project cards are placed in the center-scan area, making the app easy to navigate with one hand while on the go.
- Efficiency:** The "Recent Projects" list provides immediate status updates on deadlines, eliminating the need to click through multiple menus.
- Onboarding:** A simple, high-contrast entry screen ensures new users understand the value proposition immediately.
